You can use the Settings app to switch your Microsoft account to a local account.

Important: Microsoft recommends using a Microsoft account, not a local account, when signing in to Windows. Using a Microsoft account in Windows allows for seamless integration of Microsoft services, enhanced security, and sync across devices, unlike a local account.

1. In the Settings app on your Windows device, select Accounts > Your info
2. Select Sign in with a local account instead. You'll see this link only if you're using a Microsoft account
3. Type the username, password, and password hint. The username must be different than any others on the device
4. Select Next, then select Sign out and finish. Sign back in with your new local account
